

Trout Monitoring

Department of
Primary Industries

Central Region

REGION HIGHLIGHTS

FISH PER 100M	Duckmaloi River
CATCHABLE FISH PER 100M	Fish River
LARGEST CAUGHT	Fish River
AVERAGE SIZE OF CATCHABLE TROUT	Fish River
BEST FOR RAINBOW TROUT	Fish River
BEST FOR BROWN TROUT	Fish River

LOOKING AHEAD

- » Although the Fish River performed the best during this monitoring, a number of streams also contained good angling opportunities. Consulting the stocking website will aid further in finding a range of angling opportunities in the central region.
- » Many sites had strong survival and good numbers of small rainbow trout. Monitoring in later 2019 will hopefully show these entering the fishery for the 2019/2020 season.

OVERVIEW OF RESULTS

RAINBOW	BROWN	
3.4	0.6	FISH PER 100M
0.1	0.18	CATCHABLE FISH PER 100M
35cm	45cm	LARGEST CAUGHT
28	31	AVERAGE SIZE OF CATCHABLE TROUT

OTHER SPECIES RECORDED

- » Mountain galaxias, flathead gudgeon, redfin, mosquitofish, & European carp

Last Surveyed September 2018
